

Earth Class News

We have had an interesting week! We went on a 'virtual safari' to investigate different animal habitats, we then made our own African Savanna.

We are working hard on our maths. We have learned all about the numbers 6,7 and 8. We can move counters around to say that 6 is the same as 4 and 2 or 3 and 3.

We had a disco for Mrs King's Birthday and the children had a go at writing some birthday cards, luckily this week we learned the 'ng' sound so we were able to have a good try!

Have a lovely weekend.
